EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William Brooks (Reg. 34,129) on November 30, 2006.

The application has been amended as follows:

Claim 11 has been amended as follows:

--11. ~~[A disk for use in a]~~ A method of evaluating a magnetic head by applying an impact to the magnetic head under specific condition and then determining as to whether ~~[the]~~ a fixed layer of the magnetic head undergoes inversion of magnetization ~~[direction, said]~~ direction using a disk having bumps that apply the impact to the magnetic head while being rotated,

wherein said specific condition comprises a step of applying a magnetic field to a top of a core slider of the magnetic head when an element part of said magnetic head abuts on the bumps so as to determine as to whether the fixed layer of

the magnetic head has undergone inversion of magnetization direction, said magnetic field extending in a direction opposite the magnetization direction of the fixed layer.--

Claim 12 has been amended as follows:

--12. The [~~disk~~] method according to claim 10, wherein the bumps have been formed by applying a laser beam to a disk-shaped medium.--

Claim 13 has been amended as follows:

--13. The [~~disk~~] method according to claim 10, which has a bump region in which bumps are formed, and a non-bump region in which no bumps are formed.--

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Regarding claims 1-10, they are allowable for the reasons as indicated in the Office Action mailed September 27, 2006.

Regarding claims 11-13, the prior art does not show or teach applying a magnetic field in a direction opposite to the magnetization direction of the fixed layer in combination with the other features of the testing method recited in the claims.
